Finance Costs	(25,602)	(25,803)	(0.8)	(51,509)	(48,518)	+6.2
Distributable Income ¹	91,855	76,407	+20.2	172,733	167,718	+3.0
Distribution per Unit (DPU) ² (cents)	4.902	4.332	+13.2	9.451	9.383	+0.7
Adjusted DPU ³ (cents)	4.955	4.332	+14.4	9.504	9.383	+1.3

2H 2024 vs 2H 2023

- Higher DI and DPU underpinned by strong reversions for multiple major Singapore contract renewals in 2H 2024 as part of the Keppel Leases
- Higher gross revenue in 2H 2024 mainly due to (i) strong reversions and escalations across portfolio and (ii) contribution from acquisition of Tokyo Data Centre 1 in 2024; partially offset by divestment of Intellicentre Campus
- Guangdong DCs 2H 2024 income net off via loss allowances⁴. Impact to 2H 2024 DPU of 0.619 cents
- Higher finance income from Australia Data Centre Note and placement of deposits from the funds raised from equity fund raising in 4Q 2024
- Finance costs decreased marginally mainly due to lower interest costs and interest savings from loan repayments in 2024; partially offset by acquisitions in 2024

2024 vs 2023

- Higher DPU mainly due to (i) rent increase from strong reversions and escalations, (ii) distribution arising from the settlement sum related to the dispute at KDC SGP 1 in 1H 2024 and (iii) contribution from acquisition of Tokyo Data Centre 1 in 2024, partially offset by loss allowances for the Guangdong DCs, higher finance costs in 1H 2024 and depreciation of foreign currencies against SGD

1. Distributable Income includes Capex Reserves. Keppel DC REIT declares distributions on a half-yearly basis. The second and final tranche of distributable income of approx. S\$5.6m in 2H 2024 relating to the DXC Settlement Sum will be paid on a pro-rata basis as part of the 23rd Distribution (1 Jul – 27 Nov 2024) on 10 Feb 2025 and the balance to be paid as part of the 24th Distribution (28 Nov – 31 Dec 2024) on 17 Mar 2025.

2. Computed based on distributable income after setting aside Capex Reserves.

3. Adjusted DPU has excluded the impact from the new Units raised via the pro-rata preferential offering prior to completion of the acquisition of KDC SGP 7 & 8.

4. Rental income and Coupon Income continue to be recognised under “Gross Revenue” and “Finance Income”, corresponding netted off via loss allowance in “Property Expense” and “Other trust expenses” respectively.

05 Outlook

Data Centres to Power the **AI Revolution**

-  • The global data centre market has expanded at a steady pace, underpinned by growth from global cloud service providers (CSPs) which accounts for 22.7% of the global supply as of 3Q 2024. The global colocation data centre market took up a larger share of the global supply at an estimated 62.4% in 2024, with colocation supply growing by 15.6% year-on-year from 23.7 GW in 2023 to 27.4 GW in 2024E¹.
-  • The Asia Pacific region experienced a record high in data centre demand, growing by an estimated 18.3% or 2.46 GW year-on-year as of 3Q 2024, driven by widespread digitalisation, adoption of artificial intelligence (AI), cloud computing and 5G networks. APAC's regional data centre demand is expected to grow by a CAGR of 16.8% from 2024E to 2028F, while supply is expected to clock a CAGR of 16.2% for the same period. Future demand is expected to accelerate, underpinned by the expansion of hyperscale-based cloud computing and AI demand¹.
-  • In the FLAPD (Frankfurt, London, Amsterdam, Paris and Dublin) markets, take-up is expected to exceed supply. Vacancy rate across the primary markets is expected to close at 7.9%, a new low for these markets. Data centre providers are struggling to keep up with continued strong demand from hyperscalers across Europe due primarily to a lack of available power and land².
-  • As data centres face heightened scrutiny over their energy-intensive operations, operators are transitioning to cleaner energy alternatives such as solar and wind power for their growing availability and affordability. To secure these renewable energy supplies, power purchase agreements have emerged as a popular strategy³.
